Meeting Attendance Log						
Meeting Date	Agenda	Facilitator	Attendees	Key Discussion Points	Next Steps	
24/09/2026	Assignment kickoff: requirements review as a team, search of dataset GitHub setup, and task assignment	Solomon	Brian, Solomon	a) The notebook steps and instruments were distributed equally between the team members, as, in Solomon tackling steps 1 to 4, and Brian tackling steps 5 to 8. b) Searching of an Africanized dataset that meets all the required criteria.	a) Data preparation, standardization, covariance matrix, and eigendecomposition. b) Sort principal components, project data onto principal components, output the reduced data, and visualize before and after PCA.	

26/09/2026	a) Data preparation, standardization, covariance matrix, and eigendecomposition. b) Sorting principal components, projecting data onto them, outputting the reduced data, and visualizing before vs. after PCA.	Brian	Solomon, Brian	a) Clean and prep the dataset, standardize the features, compute the covariance matrix, and run eigendecomposition to get our eigenvalues and eigenvectors. b) Sort the components by importance, project the data onto the top ones, pull out the reduced dataset, and put together before-and-after visuals to show the effect of PCA.	Work through and complete the tasks before the communicated deadline.	
28/09/2026	Putting all the work together.	Solomon	Brian, Solomon	Review the worked on tasks and validate if it meets the team intended expectations.	Final review and submission.	
30/09/2026	Final review of the deliverables and submission	Brian	Solomon, Brian	Submission of the required deliverables.	Submit.
